

Spreader calibrations - Origin AN prilled 34.5%

The spreader settings below are for guidance only. The exact fertiliser rates and spreading patterns using these settings cannot be guaranteed as the application will be affected by the condition of the spreader itself and the environmental conditions at the time of application.

To ensure greater accuracy, the spreader should be recalibrated for application rate and spread pattern using a tray test. Up to date information can be found on the spreader manufacturers website.

Product Name	Spreader (Make/Model)	Spread Width (m)	Disc/Vane Type	Spreader Height	Tilt (°)	PTO /Disc speed (rpm)	Vane setting / Drop on point/ Discharge point	Application rate kg/ha	Forward speed km/h
