

FERTILISERS

SUSTAIN

Powered by **AGROTAIN®**

What is Origin SUSTAIN?

Urea (46%) treated with AGROTAIN® stabiliser technology, designed to minimise N losses from ammonia volatilisation. It is a urease inhibitor designed to protect yield, achieve quality and save money.

WORKS

- ✓ Yield performance consistently equal to or better than ammonium nitrate across a wide range of crops and soil types
- ✓ Powered by AGROTAIN® nitrogen stabiliser, the world's most research-proven urease inhibitor technology.
- ✓ Proven in UK and Ireland trials on wheat, barley, OSR, sugar beet and grassland.
- ✓ Used extensively on farms across the UK and Ireland as a straight nitrogen and in a range of NS grades.

The new name for **KAN**

Available as straight N, and in a range of NS and NK grades

SPREADS

- ✓ Free flowing granular product
- ✓ Proven to spread evenly to 30m+
- ✓ Spreads with all major machines
- ✓ One-third higher nitrogen concentration than AN means you can use less fertiliser for faster spreading

SAVES

- ✓ Does not have the handling, regulatory and storage challenges of AN
- ✓ Calculate the product required compared to AN

[AN tonnes] / 1.33 = Tonnes of SUSTAIN required

- ✓ Calculate the cost per kg N

[AN price] / 345 = Cost of AN
[SUSTAIN price] / 460 = Cost of SUSTAIN

- ✓ Calculate the AN price equivalent

[SUSTAIN price] / 1.33 = AN price equivalent
